

### *Leather Cover Application Tips*

*Start by inserting the planner cover into the front leather cover jacket. Be sure to work the planner cover in all the way. Complete the same procedure for the back cover and close. If the planner does not close all the way it is because one of the cover flaps is not pushed in all the way.*

### *Custom Leather Cover Care*

*The handcrafter of this gorgeous leather cover wants you to know that leather wears naturally and develops a character of its own over time. You may clean with a lightly damp cloth or use leather cleaner after you remove the leather cover from the planner. The natural oils in your fingers can gently buff out any marks you wish to blend. A slightly damp cloth with either Murphy's oil soap or leather oil may work nicely as well.*

*Enjoy!*
